PROFESSIONAL SUMMARY

Final-year Informatics Engineering student at Universitas Brawijaya (GPA 3.75/4.00; expected graduation December 2026) pursuing early-career opportunities across cybersecurity, network and cloud infrastructure, and Internet infrastructure. Hands-on experience implementing a Docker-based SIEM environment, analyzing 663,762 security alerts, administering Linux and network systems, assessing application vulnerabilities, and supporting Asia-Pacific Internet engineering education. Selected for regional and global fellowships with ICANN, APNIC, APAN, and APNG, bringing cross-cultural collaboration, communication, and leadership experience.

EDUCATION

Universitas Brawijaya

Bachelor of Informatics Engineering | GPA: 3.75/4.00

Malang, Indonesia

2023 - Dec 2026 (Expected)

Relevant Coursework: DevSecOps, Modern Network Architecture, Server System Administration, Distributed Computing, Advanced Artificial Intelligence

Scholarship: U-GO Scholarship Awardee, Indonesia 2023 Cohort (INOTEK Foundation and U-GO)

PROFESSIONAL EXPERIENCE

Teaching Assistant - Asia Pacific Internet Engineering (APIE) Class #08

Asia-Pacific / Remote

SOI Asia

Jan 2026 - Jul 2026

- Facilitated Internet engineering lectures, technical discussions, and hands-on activities for participants across the Asia-Pacific region.
- Guided participants through Internet fundamentals, network operations, and practical troubleshooting while moderating e-workshops with instructors and program organizers.
- Prepared learning resources and participant communications to support consistent delivery across online sessions.

Laboratory Teaching Assistant - Advanced Artificial Intelligence

Malang, Indonesia

Faculty of Computer Science, Universitas Brawijaya

Feb 2026 - Jun 2026

- Guided hands-on laboratory sessions covering advanced AI workflows and structured implementation approaches.
- Troubleshot Python code, environments, and dependencies; developed and evaluated midterm and final practicum examinations.

Network Administrator | Part-time Student Employee

Malang, Indonesia

Faculty of Computer Science, Universitas Brawijaya

Aug 2025 - Dec 2025

- Supported faculty network operations, connectivity monitoring, endpoint troubleshooting, and router/switch configuration in a Linux-based environment.
- Implemented a Docker-based SIEM environment integrating Wazuh, Graylog, OpenSearch, and MISP; configured endpoint enrollment, log pipelines, File Integrity Monitoring, vulnerability visibility, and notifications.
- Analyzed 663,762 security alerts covering authentication, integrity events, vulnerabilities, MITRE ATT&CK mappings, agent health, and high-severity findings.
- Resolved Docker networking and log-pipeline faults and documented test evidence, findings, and infrastructure-hardening recommendations.

SELECTED PROJECTS

Undergraduate Research - DNS Response Amplification Measurement

Aug 2026 - Present

Technologies: Python, DNS/DNSSEC, UDP/TCP, Active Measurement, Data Analysis

- Analyze DNS message response-to-query amplification factors for .ac.id academic domains and matched .id domains across DNSSEC status and query types.
- Validate authoritative-response paths and transport outcomes, separating UDP amplification inference from TCP fallback to preserve methodological validity.

Go4Beyond AI Visa Readiness Platform - APIE Advanced Camp

Jul 2026

Technologies: Docker Compose, Linux, FastAPI, PostgreSQL, Redis, MinIO, Nginx/Traefik, JWT/RBAC

- Co-developed a modular proof of concept using 11+ localized Docker services across application, API, storage, database, queue, search, and AI workloads.
- Secured service interfaces and document-processing flows using JWT/RBAC, time-limited uploads, encryption, rate limiting, health checks, and ephemeral processing.

SELECTED PROJECTS (CONTINUED)

OJS Vulnerability Assessment - DevSecOps Team Project

Mar 2026 - Apr 2026

Technologies: Semgrep, OWASP ZAP, CVSS v3.1, OWASP Top 10, CWE, PHP, Docker

- Personally identified and documented four findings, including insecure deserialization (CVSS 7.3), potential command injection (7.2), user-data API exposure (6.5), and phpinfo exposure (5.3).
- Combined static and dynamic testing with manual validation, contributing to a 15-finding risk register and prioritized remediation roadmap.

Zero Trust Secure Overlay Network for Indonesian Fashion SMEs

2025

Technologies: NetBird, WireGuard, AWS EC2, Ubuntu, Flask, JWT, Nextcloud, Access Control Lists

- Implemented a three-node secure overlay network and identity-aware access scenarios for distributed SME collaboration.
- Applied JWT authentication and access-control rules, validating authorized and unauthorized access while measuring approximately 3-5 ms of overlay latency overhead.

FELLOWSHIPS & ACHIEVEMENTS

Selected ICANN87 Fellow - 2026 Annual General Meeting

Bali, Indonesia

- Selected 1 of 40 fellows from 763 applicants across 34 countries to engage with ICANN's global multistakeholder community.

APNGCamp18 Fellow

Tangerang, Indonesia

- Selected 1 of 46 fellows from across the Asia-Pacific region for a mentor-supported program on Society 5.0 and human-centered digital leadership.

APAN 61 Fellow

Dhaka, Bangladesh

- Completed fellowship responsibilities and delivered an invited 10-minute presentation during the SOI Asia APIE session.

APNIC 60 Youth Fellow

Da Nang, Viet Nam

- Selected 1 of 9 Youth Fellows in the 2025 cohort, representing Indonesia in Internet infrastructure, policy, and network-security learning activities.

National Incentive Award - PKM-GFT

2024

- Recognized by Indonesia's national Student Creativity Program for STARCabinet, a metaverse-based anti-corruption education concept using micro-credentials and gamification.

2nd Place - National UI/UX Competition, HIMTI Festival

2024

- Contributed to user research, problem definition, user flows, wireframing, prototyping, usability testing, and the final competition pitch.

LEADERSHIP & COMMUNITY

Head of Business Department

Jan 2025 - Dec 2025

HMDTIF FILKOM Universitas Brawijaya

Malang, Indonesia

- Managed partnerships with 12 companies and led merchandise planning, promotion, and sales initiatives that generated IDR 20 million in net profit.

DevOps

Apr 2025 - Dec 2025

POROS Organization of Open Source

Malang, Indonesia

- Supported Docker and Docker Swarm deployment, configuration validation, troubleshooting, and operational documentation for the KnowHub project.

Computer Vision Specialist - Quadcopter Division

Mar 2025 - Dec 2025

ROBOTIIK FILKOM UB

Malang, Indonesia

- Developed Python/OpenCV workflows and evaluated wireless range, latency, interference, power, and compatibility for quadcopter operations.

TECHNICAL SKILLS

Languages: Indonesian - Native; English - C1 Advanced (EF SET)

Security Operations: SIEM, Wazuh, Graylog, OpenSearch, MISP, MITRE ATT&CK, FIM, alert triage, log analysis

Application & Network Security: OWASP Top 10, CVSS v3.1, CWE, Semgrep, OWASP ZAP, TCP/IP, DNS/DNSSEC, Zero Trust, JWT/RBAC, Wireshark, pfSense

Programming & Infrastructure: Python, SQL, Bash, C/C++, Linux, Docker/Compose, Kubernetes, AWS EC2, Nginx, PostgreSQL, Git, CI/CD
